

COVID-19 IMPACT IN CUYAHOGA COUNTY, OH

By Ryan Williams

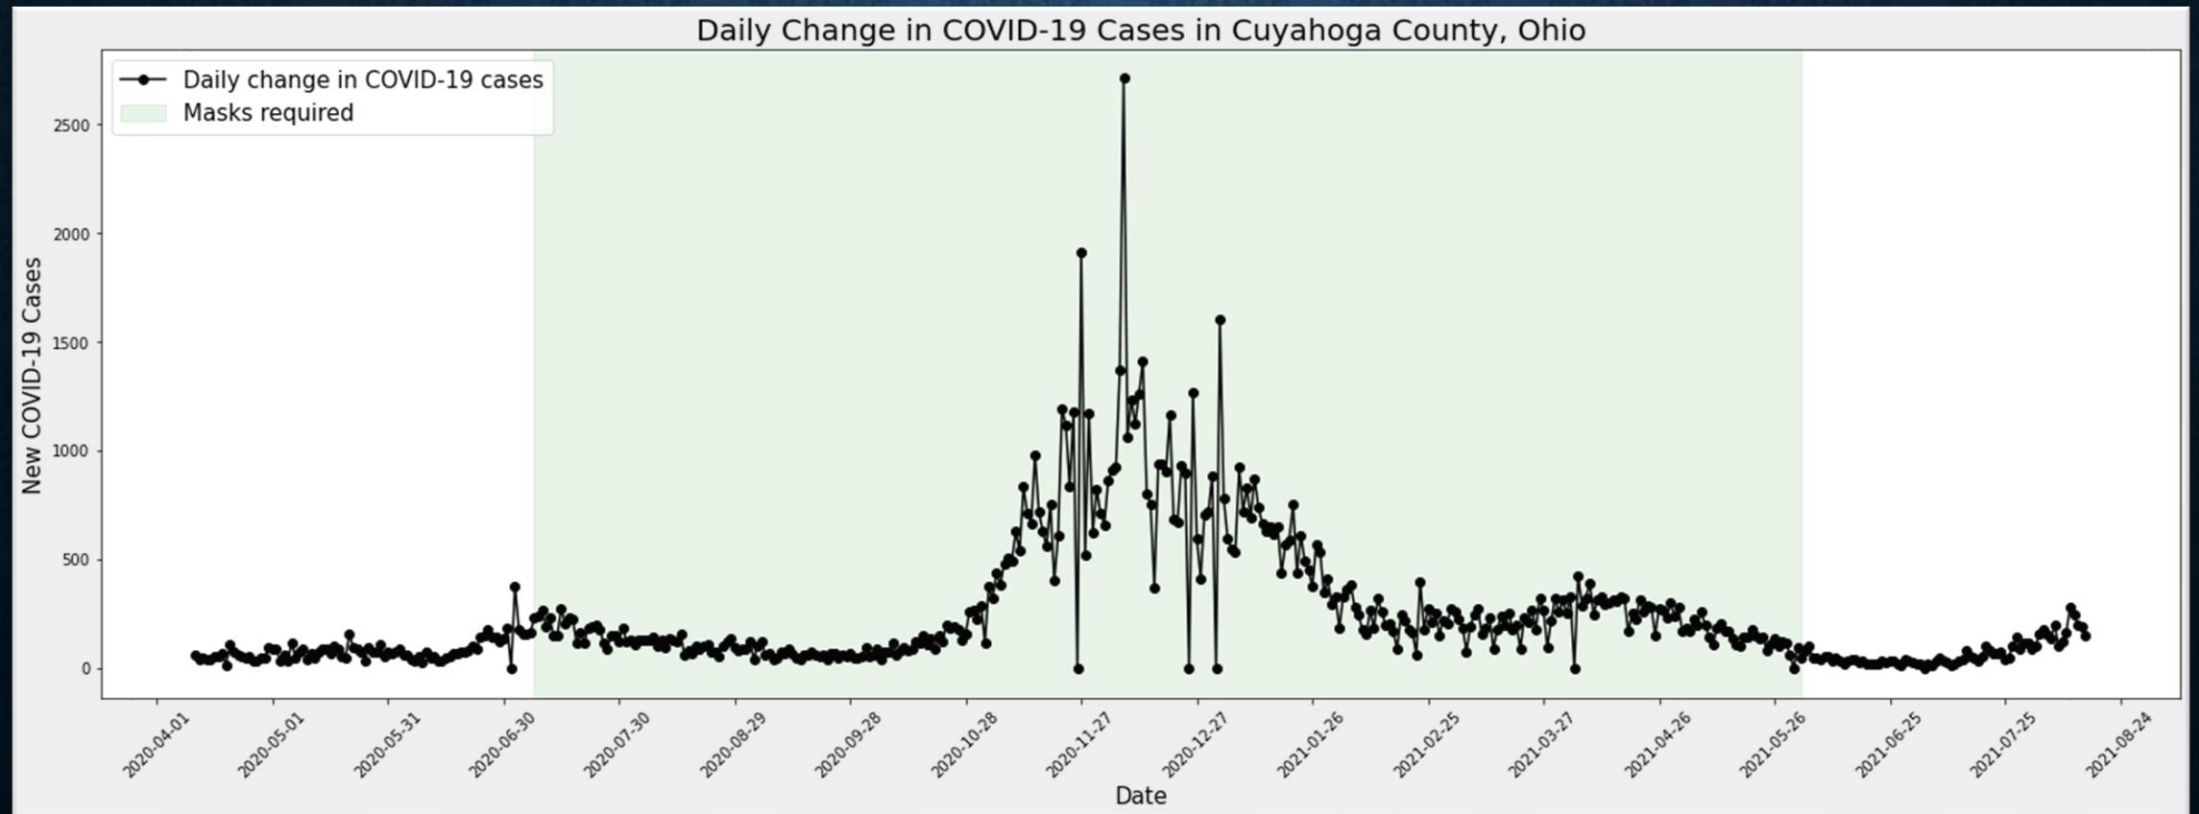

RESEARCH QUESTIONS

1. Did masking policies change the progression of COVID-19 cases in Cuyahoga County, OH?
2. Is there a correlation between COVID-19 infections and unemployment in Cuyahoga?
3. Was employment in Cuyahoga impacted more by COVID-19 than the other counties in the Cleveland-Elyria metropolitan area?

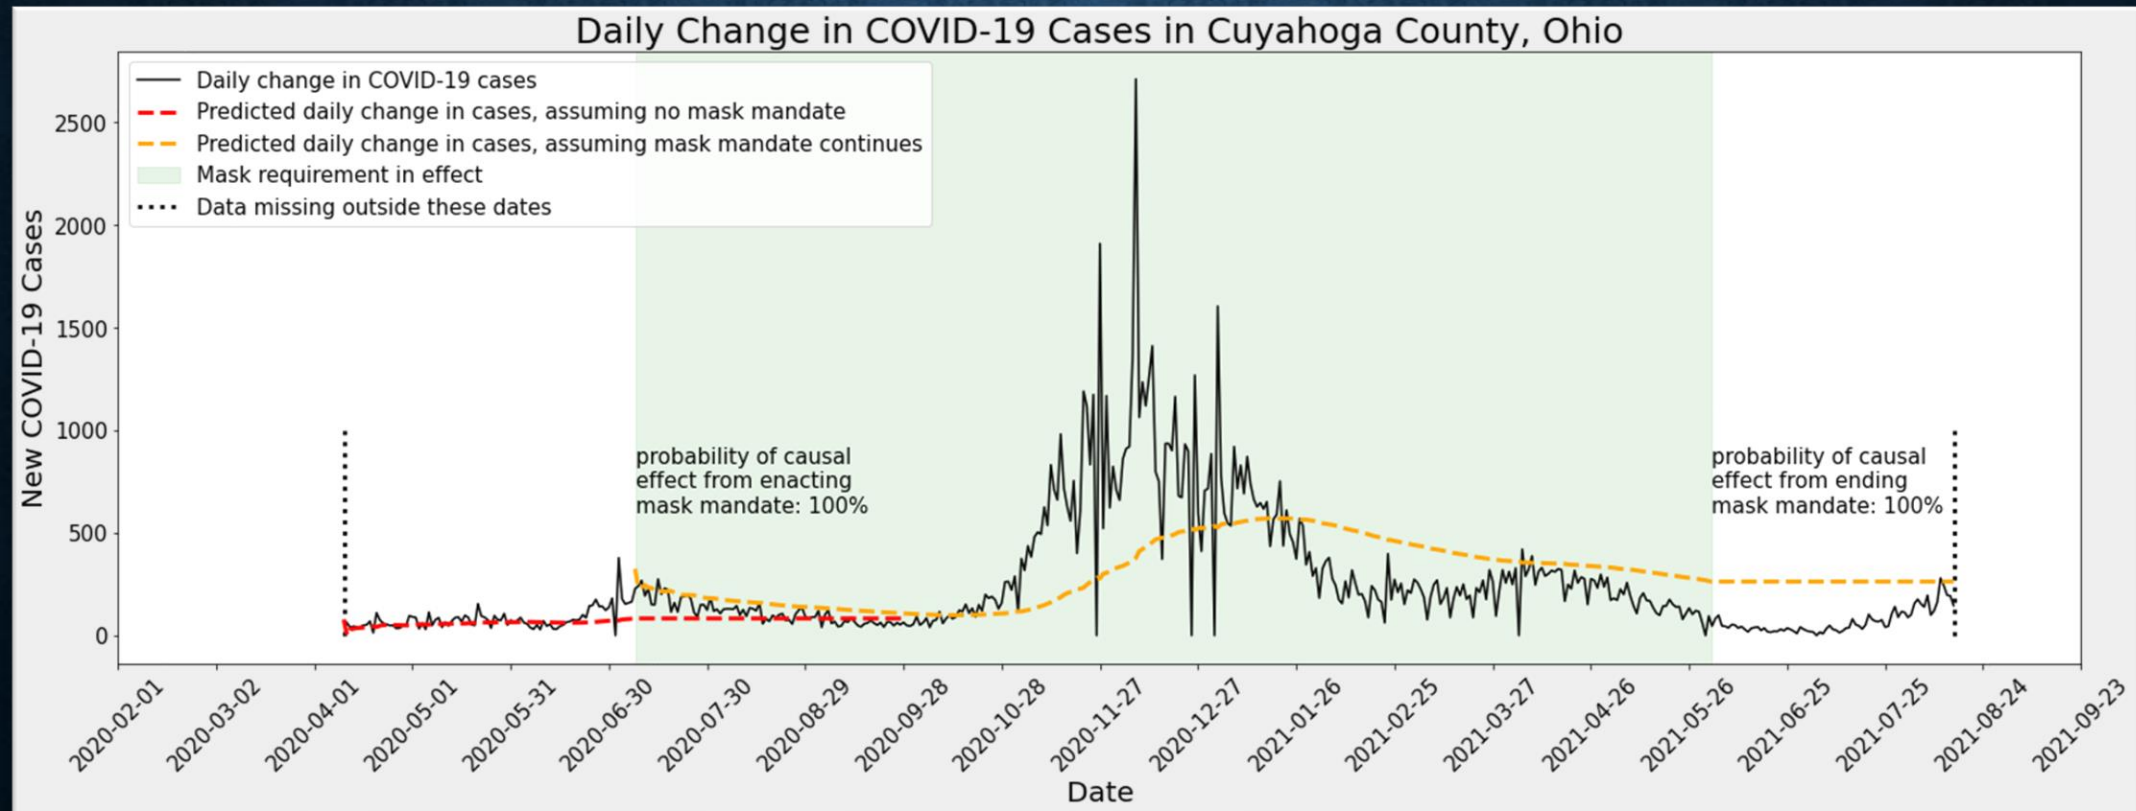

Q1: DID MASKING POLICIES CHANGE THE PROGRESSION OF COVID-19 CASES IN CUYAHOGA COUNTY, OH?

- Methodology: Take a counterfactual approach using time series forecasts

Q1: DID MASKING POLICIES CHANGE THE PROGRESSION OF COVID-19 CASES IN CUYAHOGA COUNTY, OH?

- Result: Statistical significance in forecast vs. actuals, but forecasts are naive

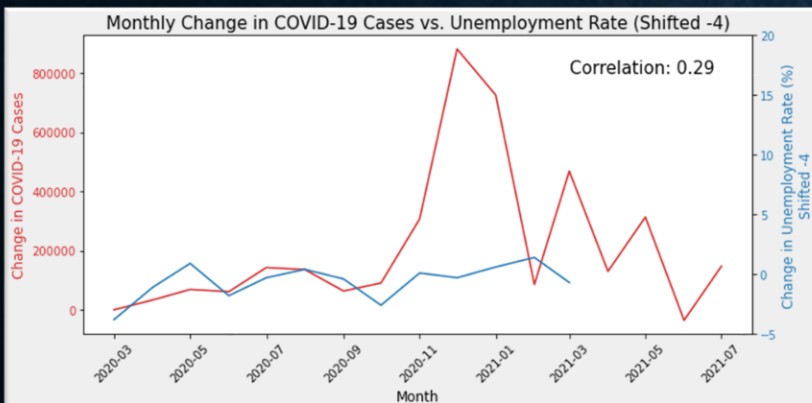

Q2: IS THERE A CORRELATION BETWEEN COVID-19 INFECTIONS AND UNEMPLOYMENT IN CUYAHOGA?

- Methodology: Calculate Pearson correlation between monthly change in COVID-19 cases and unemployment

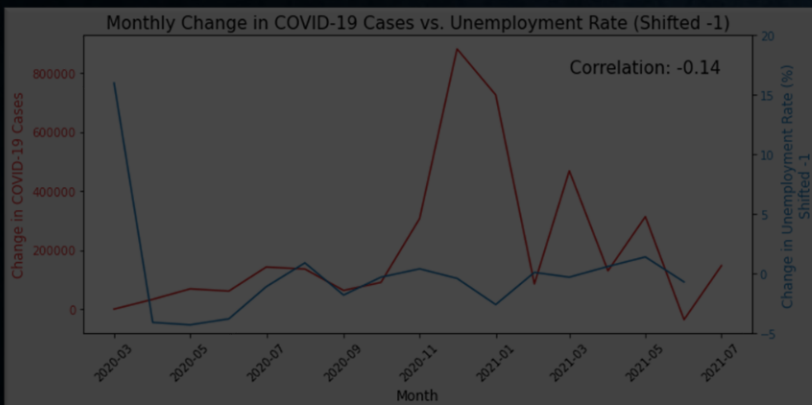

Q2: IS THERE A CORRELATION BETWEEN COVID-19 INFECTIONS AND UNEMPLOYMENT IN CUYAHOGA?

- Methodology: Introduce lags since infections may be a leading indicator

Q2: IS THERE A CORRELATION BETWEEN COVID-19 INFECTIONS AND UNEMPLOYMENT IN CUYAHOGA?

- Result: Correlation is highest with a 5-month lag, but never very high

Q3: WAS EMPLOYMENT IN CUYAHOGA IMPACTED MORE BY COVID-19 THAN THE OTHER COUNTIES IN THE METRO AREA?

- Methodology: Compare OLS regressions for each county (values & slope)

Q3: WAS EMPLOYMENT IN CUYAHOGA IMPACTED MORE BY COVID-19 THAN THE OTHER COUNTIES IN THE METRO AREA?

- Methodology (cont.): Calculate significance of difference in actuals & slope using two separate regressions

Unemployment ~ 1 + Time + County

Dep. Variable:	Unemployment	R-squared:	0.672
Model:	OLS	Adj. R-squared:	0.649
Method:	Least Squares	F-statistic:	29.68
Date:	Sun, 05 Dec 2021	Prob (F-statistic):	9.64e-08
Time:	01:21:09	Log-Likelihood:	-75.375
No. Observations:	32	AIC:	156.8
Df Residuals:	29	BIC:	161.1
Df Model:	2		
Covariance Type:	nonrobust		

	coef	std err	t	P> t	[0.025	0.975]
Intercept	14.6252	1.021	14.321	0.000	12.537	16.714
County[T.Gauga]	-3.5937	0.947	-3.793	0.001	-5.532	-1.656
Time	-0.6892	0.103	-6.706	0.000	-0.899	-0.479

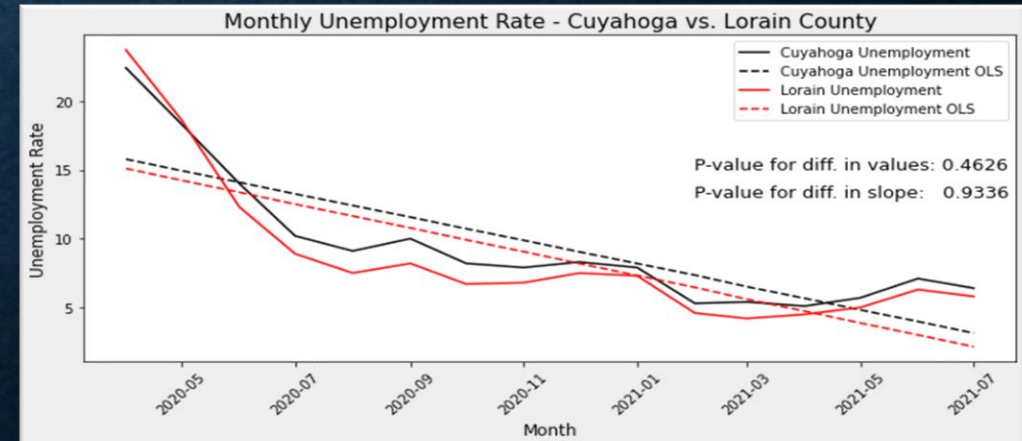

Unemployment ~ 1 + Time + County + (Time * County)

Dep. Variable:	Unemployment	R-squared:	0.697
Model:	OLS	Adj. R-squared:	0.664
Method:	Least Squares	F-statistic:	21.46
Date:	Sun, 05 Dec 2021	Prob (F-statistic):	2.03e-07
Time:	00:04:51	Log-Likelihood:	-74.103
No. Observations:	32	AIC:	156.2
Df Residuals:	28	BIC:	162.1
Df Model:	3		
Covariance Type:	nonrobust		

	coef	std err	t	P> t	[0.025	0.975]
Intercept	15.7728	1.251	12.605	0.000	13.210	18.336
County[T.Gauga]	-5.8890	1.770	-3.328	0.002	-9.514	-2.264
Time	-0.8422	0.142	-5.925	0.000	-1.133	-0.551
Time:County[T.Gauga]	0.3060	0.201	1.522	0.139	-0.106	0.718

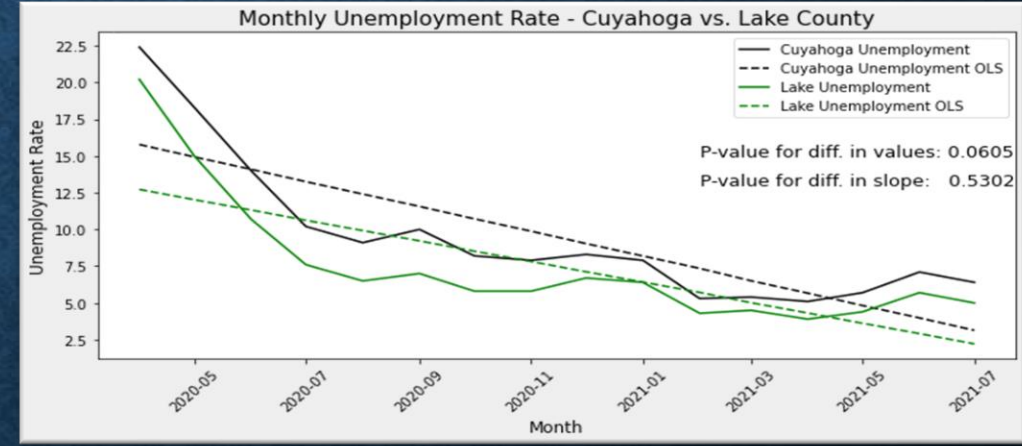

Q3: WAS EMPLOYMENT IN CUYAHOGA IMPACTED MORE BY COVID-19 THAN THE OTHER COUNTIES IN THE METRO AREA?

- Result 1 (Values): Geauga, Medina significantly different at $\alpha = 0.0125^*$ level

Q3: WAS EMPLOYMENT IN CUYAHOGA IMPACTED MORE BY COVID-19 THAN THE OTHER COUNTIES IN THE METRO AREA?

- Result 2 (Slopes): No differences statistically significant at $\alpha = 0.0125^*$ level

SUMMARY OF CONCLUSIONS

1. Masking policy did have a significant impact on the spread of COVID-19 in Cuyahoga (but need a less naïve infection model to validate)
2. Weak correlation between changes in infection rate and unemployment – likely policy driven rather than infection driven
3. Unemployment rate in Cuyahoga was significantly higher than Geauga and Medina throughout the pandemic, but rate of change not significantly different than any other county in metro area
